BRENNON HILL

Littleton, Colorado | brennon.hill@gmail.com | 720-697-3046

PROFESSIONAL PROFILE

Computer science student at Warren Tech with hands-on experience leading software development for NASA HUNCH projects and FIRST Robotics. Technical background includes Python, Java, C, Raspberry Pi development, Linux systems, and hardware/software integration, with additional academic study in C++. Project work includes environmental sensing, AI-assisted monitoring, and robotic systems. Accepted to Computer Science programs for Fall 2027.

EDUCATION

Dakota Ridge Senior High School | *Littleton, CO* May 2027

GPA: 3.85 unweighted / 4.30 weighted; AP Calculus BC (in progress); Legacy Awards in Math and Spanish.

Warren Tech Central | *Computer Science & Cybersecurity* 2025–2027

Coursework: Programming, cybersecurity, Linux systems, web development, and database management.

Red Rocks Community College | *Concurrent Enrollment* 2025–2027

College coursework: Python, Database Design & Development, Introduction to SQL, and Fundamentals of Unix (in progress).

SELECTED TECHNICAL PROJECTS

NASA HUNCH | AI Plant Growth Lab | *Project Lead & Lead Programmer* 2026–Present

- Lead software development on a three-student team building an automated plant-growth system for space-related research.
- Develop Raspberry Pi controls for environmental sensors, nutrient dosing, AI monitoring, and robotic pollination.

NASA HUNCH | ISS Predictive Maintenance Project 2025–2026

- Helped develop the architecture of an AI system designed to identify potential anomalies in ISS life-support operations.
- Researched NASA's Environmental Control and Life Support System; the team received a Letter of Recommendation from the director of NASA HUNCH and was selected to present at Johnson Space Center in Houston.

FIRST Robotics Competition | *Lead Programmer* 2023–Present

- Programmed an automated robot vision-tracking system using Java and Python; mentor fellow student programmers.
- Collaborated with 20+ team members during design and competition seasons; the team reached regional playoffs in 2026.

TECHNICAL SKILLS & CERTIFICATIONS

Programming: Python, Java, C, C++ (academic study), SQL, HTML

Development tools: Git, GitHub, Visual Studio Code

Systems & platforms: Linux command line, Raspberry Pi

Technical areas: AI, robotics, cybersecurity, database systems, hardware/software integration

Certifications: PCEP Certified Entry-Level Python Programmer (Dec 2025); TestOut Linux Pro (Apr 2026); Autodesk Fusion User (Nov 2024)

WORK EXPERIENCE & COMMUNITY INVOLVEMENT

AMC Theatres | *Theatre Crew Member* 2026–Present

- Support guest service, concessions, ushering, and theatre operations in a part-time customer-facing role.

Dakota Ridge Soccer | *JV Captain & Team MVP* 2023–2025

- Played high school soccer and volunteered with adaptive youth soccer activities for children with disabilities.
